

Turn your AART™ into a HIT™

We welcome you to experience the AART™ Methodology in practice with **Dr Frank Rosengaus**, Plastic Surgeon. Join Dr Rosengaus as he applies the AART™ Methodology while introducing the first HIT™ to Australia – Shape Up™ HIT™, for a non-surgical lifting effect.

Date **Saturday 25th March 2023**

Time **1.00pm - 2.00pm**

Venue **Crown Conference Centre, Melbourne**
Room M1 & M2

**PLACES ARE LIMITED!
REGISTER NOW VIA YOUR
ASCD REGISTRATION**

Lunch will be served in the workshop room.

Galderma's **AART™** methodology uses **Assessment** with a facial assessment scale to identify patients' needs and priorities, **Anatomy** analysis to fully assess the patient, the **Range** of solutions from the Galderma aesthetics portfolio and tailored **Treatment** plans for **Holistic Individualised Treatment (HIT™)**.

A **HIT™** is a patient-centric treatment system that allows Healthcare Professionals to translate patient goals into an individualised treatment plan through effective assessment and dialogue. HIT™ naturally springboards from the AART™ methodology for a new generation in individualised aesthetics.

**SHAPE
UP™ HIT™**
by GALDERMA

Over the course of 2023/24, Galderma will launch a series of HIT™ frameworks tailored to address different patient concerns and a variety of patient profiles, starting at this event with Shape Up™ HIT™, for a non-surgical lifting effect.

Dr Frank Rosengaus
Plastic Surgeon, Mexico.

Dr Frank Rosengaus is one of the top internationally renowned experts on non-invasive aesthetic procedures. With over 20 years of experience in medicine and facial aesthetic surgery, he is well known for his state-of-the-art techniques for full facial balance, suspension sutures and botulinum toxin. He is the Medical Director for the BTX BAR clinics (Mexico City, Monterrey and Paris) and ULTIMATE MEDICA Polanco.

This is an educational meeting for Healthcare Professionals only.
Hospitality can only be extended to individuals invited as delegates.
